

## THE MOBILE PHONE BOOTH

Gpod Mini is the mobile phone booth combining fantastic acoustics with beautiful design. Both a space for private phone calls, and a room for undisturbed work. The world class sound insulation blocks the sound and your conversations can absolutely not be heard from the outside - privacy proof! We use Gustafs unique Nano technique for a superb interior sound absorption and the high capacity air refreshment system is so silent you won't notice it. That's comfortable working and perfect for tasks that require your concentration or when making important decisions.

### WORLD WIDE REFERENCES

After years of international business experience, we know how to support, drive and take care of the whole process for optimal customer satisfaction. Contracting Gustafs is a reliable.

### GREEN GUSTAFS

Surrounded by the beautiful landscape in central Sweden, it's natural for us to take care of the environment. That's why our factory has a pro-active environmental program and use renewable energy only!

### SUSTAINABILITY

Gpod Mini is sturdy, it's mobile and it's flexible regarding placement and furniture layouts for all your future needs and an overall long lifetime. The surface materials used in our Gpod Mini contain 94% recycled materials, with 17% coming from post-consumer goods. In case you care, or have a LEED or BREEAM building!

### FIRE

For decades Gustafs products have been synonymous with fire safety. All Gpods have non-combustible surfaces, A2-s1,d0. For your safety. No sprinklers needed!

### ACOUSTICS

We always design for eyes but also for ears and have for example supplied the world's most famous concert halls and royal music academies. Using our knowledge from large architectural projects, we have created the most comfortable and private small workspaces for your office.

# FEATURES

## WORLD CLASS ACOUSTICS

Due to our unique Nano perforation we can combine beautiful wooden surfaces with great sound absorbing coefficients for comfortable conversations, face to face or by video. The superb sound blocking qualities makes our pod private proof and the super silent high airflow ventilation system completes the total acoustic experience – for many hours of relaxed and joyful working.

## FLEXIBLE PLACEMENT

If it isn't mobile, it's not a pod. With integral wheels, the Gpod Mini is easily moved around with a precise positioning, and you can simply and quickly reposition it anytime you want. The power inlet options are multi-universal. Place it anywhere you want!

## DESIGN

Gpod Mini is the result of more than 100 years experience of Scandinavian wood design. The design is simple and timeless, but the robust timber frame design gives it a unique and exclusive appearance and the transition from the wooden frame to the glass is completely seamless. The design is underlined by only using the best natural materials and we craft them with care, for an outstanding quality and finish.

## PRIVACY PROOF

The soundproof qualities of Gpod Mini are at least as important as the comfortable acoustics inside the Gpod. In fact, you can place the Gpod Mini next to a workstation in the middle of an office and people working next to the Gpod will not be able to hear the phone calls taking place inside. Gpod Mini is both a private workspace and a room for important thoughts and decisions.

## THE INTELLIGENT POD

Our Gpod Mini is equipped with the Ochno Technology System. Lights and fans are automatically controlled by a sensor so that they adapt to how the pods are used. These parameters can also be set and adjusted for when no one is in the pod, when people are inside or with delays after usage. Automatic control can be over-ruled by app or direct with the elegant dimmers on the pod's inner walls. Our Gpod's are the first intelligent cellular workspaces in the world. Modern pods, for modern workspaces.

## FLEXIBLE LAYOUTS

The Gpod Mini is available with two configurations and the good thing is that you can change it any time. Both come with an exclusive wooden interior and designer furniture, adjustable for your purpose. Of course both layouts have height adjustable tables and seating solutions, in case you appreciate to vary your working position. We know the value of good ergonomics and active working!

# EDITIONS & SPECIFICATIONS

## BUSINESS EDITION

Magnetic soft close door mechanism  
Full width door  
Stainless steel threshold cover list  
Black door handle with skin  
Double LED lights  
Adjustable ventilation speed  
Detector for motion and air quality - automatic high/low for lights and air refreshment  
Universal right and left door model - power in left/right/ceiling  
Integral XL wheels for real mobility  
MBF ready (Mobile By Forklift)  
Easy access leveling system  
2 USB-C sockets (power, LAN, Video, etc)  
Integral wall suspension system in both walls and in 2 levels  
Table in the same wood design as the walls and ceiling

## CONNECTIONS

Gpod Intelligent workspace by OCHNO connected (requires access to WiFi), yearly fee, separate license agreement

## AIR QUALITY & GREEN

Super silent high capacity air refreshment system  
Very low emitting surfaces, interior and exterior  
FSC wood  
Plastic free insulation

## PRIVACY

Sound Proof Privacy Glass  
Dark Privacy Glass

## ACCESSORIES

Clothes hanger  
VGA Video Conference Screen Adapter for wall mounting

# SPECIFICATIONS

<b>Type</b>	Gpod Mini with acoustic Nano outer wall surfaces or Gpod Mini with acoustic Linear outer wall surfaces
<b>Capacity</b>	For 1 person, working facing the left or right wall or the backside glass. For lay outs see <a href="http://www.gustafs.com">www.gustafs.com</a>
<b>Outer dimensions</b>	Total footprint: 1420x1250 mm (wxd) Total height: 2380 mm
<b>Inner dimensions</b>	Floor space: 990x1220 mm (wxd) Standing height: 2010 mm
<b>Mobility</b>	By integrated wheels, can be rolled over 20 mm thresholds. By forklift - can be raised 100 mm from the floor. By forklift - truly self-supporting construction.
<b>Placement</b>	Universal placement for Centre, Wall, Left Corner and Right Corner
<b>Weight</b>	490 kg
<b>Front door</b>	Full width door 2000x1007 mm, opening 180° to full width. Magnet soft close. Sound proof glass, tempered, privacy dark tone.
<b>Backside glass</b>	990x1999 mm, sound proof glass, tempered, privacy dark tone.
<b>Surfaces</b>	All veneers are real wood veneer in architectural quality. Other veneers than the standards below on request only.  Front Frame: Ash / Oak / Cherry / Walnut Back Frame: Ash / Oak / Cherry / Walnut Outside walls: Ash / Oak / Cherry / Walnut / White CPL / Black CPL Inside walls: Ash / Oak / Cherry / Walnut / White CPL / Black CPL Inside ceiling: Ash / Oak / Cherry / Walnut Inside flooring: Anthracite Grey
<b>Surface treatment</b>	Triple UV coating approved for cleaning with up to 70% alcohol products / Pigmented Triple UV coating approved for cleaning with up to 70% alcohol products. The flooring is antistatic, dirt resistant and acoustic.
<b>Veneer Direction</b>	Along length
<b>Fixture system</b>	For the wall and ceiling claddings Gustafs Capax is used, consisting of aluminium profiles gripping the full length of the sides of the panels, levelling and aligning the panels.
<b>Intelligent sensor</b>	Measures light, air quality and motion. Connected to and automizing the lightning and ventilation, all by OCHNO Operated.
<b>Ventilation</b>	Oversized airflow of 45,1 l/s (162,4 m3/h), achieved with 3 low speed whisper fans. Automatic/manual rpm control and sound proof in- and outlets.
<b>Air inlet</b>	Easy access regardless the placing of the Gpod for cleaning and maintenance
<b>Power input</b>	230 V, enters from left, right or the roof. This can be changed anytime.

# SPECIFICATIONS

<b>Sockets, output</b>	2 x USB-C		
<b>Lighting</b>	2 x LED spotlights, automatic/manual control, dimmable.		
<b>Wheels</b>	4 pcs, diameter 125 mm, swing.		
<b>Adjustable feet</b>	4 pcs, adjustable from 20 – 100 mm height, access from the inside.		
<b>Reaction to Fire</b>	Up to A2-s1,d0 (EN 13501-1) (Valid for the inside and outside claddings, including the fixture system, the veneered surface and the surface treatment.		
<b>Resistance to Fire</b>	Up to K1-10/K2-10 (EN 13501-2)		
<b>Acoustic absorption</b>	Outside and Inside wall: Gustafs Nano	w 0,85-B	NRC 0,9
	Inside ceiling: Gustafs Stripes RP8-C20	w 0,65-C	NRC 0,7
	Inside flooring: Sound absorbing carpet	w 0,30-D	NRC 0,45
<b>Sound proof</b>	<p>The sound insulation of Gpod Mini is great and it can be placed next to other workstations in the middle of an office and people working next to the pods will not be able to hear conversations taking place in them. Conversations inside Gpod can be made 100% discrete.</p> <p>We prefer not to give out the results of sound insulation measurements done to our product. At the moment, there isn't a standardized test for measuring the sound insulation of small enclosed spaces like Gpod Mini. The sound insulation of a Gpod Mini also varies depending on measuring sound coming out from the Gpod Mini and sound entering the Gpod and there are no standardized tests covering this phenomenon. That is why existing acoustical ratings are not a good reflection of the experience using a Gpod. We recommend you try a Gpod Mini in order to evaluate whether our products' sound insulation is sufficient to meet your needs.</p>		
<b>DoP</b>	Available		
<b>LEED</b>	TVOC	approved emissions (EN ISO 16000-9)	
	Formaldehyde	approved emissions (EN 717-1) No added urea formaldehyde	
	Recycled Material	Wall materials in 17% Post Consumer
